LB 568A

and many other things with other bills but this also recognizes, and I guess what we are trying to say with this amendment is that as I indicated in my closing there are those school districts that do not provide this, this service, but if we put enough dollars in there that will encourage them to provide it, and that is what we are talking about with 568, so what we are saying with this amendment is that we will put \$2 million in the first fiscal year, \$4 million in the next fiscal year. Now there are those people that I am sure are going to say, well, this is a start of something that is going to require more funds down the road and I won't disagree with that. We are making a philosophical decision this morning that vocational education is important and that we, the state, are going to help provide the funds for that vocational education, and as more and more schools take advantage of it, as more and more students are given the opportunity, undoubtedly, undoubtedly it is going to cost us a little more dollars but I am willing to do that and I would hope this body is. So I would urge adoption of this amendment.
